Bangalore, India

Professional Summary

Computer Science Engineering (Data Science) student with hands-on experience developing backend applications, REST APIs, database-driven systems, and full-stack web applications. Proficient in Python, JavaScript, TypeScript, SQL, PostgreSQL, MySQL, and REST API development, with practical experience in backend services, CRUD operations, authentication, database design, API integration, debugging, and software development workflows. Familiar with MVC-based application architecture, web APIs, Git/GitHub, and modern application development practices, with strong ability to learn new technologies and frameworks.

Technical Skills

Languages: Python, JavaScript, TypeScript, SQL
Backend: REST APIs, Node.js, Express.js, API Development, CRUD Operations, MVC Architecture
Databases: SQL, MySQL, PostgreSQL, MongoDB, Supabase, Database Design
Frontend: React.js, HTML5, CSS3
AI/ML: Machine Learning, NLP, Scikit-learn, TensorFlow
Tools: Git, GitHub, Postman, Docker, Kubernetes

Experience

Edunet Foundation (in collaboration with Shell India & AICTE) **Remote**
Data Science & AI Intern *June 2025 – July 2025*

- Developed Python-based data processing workflows for 2,500+ image records, implementing preprocessing, validation, transformation, and automated processing pipelines.
- Built and evaluated machine learning models achieving 94% classification accuracy, debugging model pipelines and optimizing parameters for improved performance.
- Used Git for version control and collaborated on development, testing, documentation, and debugging throughout the project lifecycle.

1M1B – AI for Sustainability Virtual Internship **Remote**
AI for Sustainability Intern *July 2026 – Sep 2026*

- Applied data-driven AI approaches to real-world sustainability problems through structured technical projects involving data analysis and AI solution development.
- Analyzed datasets and explored AI-based solutions, gaining practical exposure to data processing, analytical workflows, and technology-driven problem solving.
- Completed technical learning activities through IBM SkillsBuild and applied software and AI concepts to sustainability-focused use cases.

Projects

AIET-UniSphere – Student Management Portal | ***React.js, TypeScript, Supabase, PostgreSQL, REST APIs*** **2026**

- Developed a full-stack student management portal using React.js, TypeScript, Supabase, and PostgreSQL with role-based workflows for Students, Faculty, HODs, and Administrators.
- Designed database schemas and migrations and developed REST API and Edge Function workflows for profile management, administrative account provisioning, and secure backend operations.
- Implemented authentication, authorization, and Row Level Security (RLS) for secure access to attendance, assignments, announcements, leave requests, and notifications.

GrokCity – Real-Time NLP Analytics Platform | ***Python, Node.js, REST APIs, WebSockets*** **March 2026**

- Built a real-time NLP analytics platform using Python pipelines for sentiment analysis, processing 100+ concurrent data streams with low-latency data processing.
- Implemented data validation, deduplication, and schema enforcement to improve data accuracy and consistency across multiple input sources.
- Developed REST API and WebSocket-based workflows for real-time data processing, analytics, and monitoring.

AeroBuy E-Commerce Data Platform | ***Python, MongoDB, SQL, REST APIs, Excel*** **July 2026**

- Designed Python-based ETL pipelines to ingest, clean, and transform 200+ product records for downstream analytics and application workflows.
- Optimized MongoDB aggregation pipelines and indexing strategies, reducing data retrieval latency by 35% and improving data access performance.
- Developed REST APIs for product catalog, cart management, and order processing while analyzing data to support data-driven decisions.

Education

Alva's Institute of Engineering and Technology **Mangalore, India**
Bachelor of Technology in Computer Science Engineering (Data Science) *2023 – 2027*

Jnana Jyothi Pre-University College **Bangalore, India**
Pre-University Course in PCMB *2021 – 2023*

Yashas Vidya Kendra **Bangalore, India**
High School (10th) *2020 – 2021*

Certifications & Awards

- **Awards:** Galactic Problem-Solver – NASA Space Apps Challenge (2025); Department Hackathon Winner (2026).
- **Certifications:** Power BI Micro Course; Software Design and Project Management – HKUST via Coursera.
