Bangalore, India

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in Java, React, and REST APIs. Skilled in developing scalable cloud-based applications, building real-time data pipelines, and integrating distributed systems. Quick to learn emerging technologies, collaborate with cross-functional teams, and deliver high-quality software solutions in fast-paced environments.

TECHNICAL SKILLS

Core Languages: Java , Python , SQL, C

Frontend Integration: React, Rest APIs, Cloud-Based Applications, Software Development Lifecycle

Backend Data Engineering : API Design, ETL, MongoDB, PostgreSQL, Supabase

Tools Frameworks: Flask, Next.js, Scikit-learn, OpenCV, Git, Linux

EXPERIENCE

Edunet Foundation (in collab. with Shell India & AICTE)

Remote

Artificial Intelligence & Data Analytics Intern

June 2025 – July 2025

- Engineered an automated deep learning pipeline utilizing Transfer Learning (ResNet, VGG) to classify complex visual data, achieving a high-performance inference accuracy of 94%.
- Developed scalable data preprocessing scripts in Python and OpenCV to aggressively clean, augment, and normalize a raw, unstructured dataset of 5,500+ records.
- Optimized model hyperparameters and applied data intelligence techniques to mitigate class imbalances, reducing algorithmic overfitting by 20% across 3 primary categories.

PROJECTS

Job Application Tracker API | Java, REST APIs, PostgreSQL

July 2026

- Developed RESTful backend using Java for managing job applications.
- Implemented CRUD operations with persistent PostgreSQL storage.
- Added resume parsing functionality for automated candidate information extraction.

YamlAnchor - CI/CD Integration & Automation Engine | Next.js, Docker, Go, Git Actions

April 2026

- Built a local-first CI/CD automation tool that scans a repository, auto-generates GitHub Actions YAML, and **validates pipelines inside Docker containers** before any remote push.
- Automated pipeline generation and validation system demonstrating real-time integration patterns.
- Automated repository scanning and YAML generation for GitHub Actions workflows, improving CI/CD pipeline consistency.

AeroBuy - E-Commerce REST API Backend | Python(Flask), MongoDB, REST APIs

July 2025

- Designed a scalable database architecture for an e-commerce application managing 200+ products.
- Implemented MongoDB aggregation pipelines and SQL indexing to enhance query performance and support efficient analytics.
- Developed REST APIs for product and inventory management using Flask and MongoDB.

EDUCATION

Alva's Institute of Engineering and Technology

Mangalore, India

Bachelor of Technology in Computer Science Engineering (Data Science); CGPA: 7.25

2023 – Present

Jnana Jyothi Pre-University College

Bangalore, India

Pre-University Course in PCMB; 77%

2021 – 2023

Yashas Vidya Kendra

Bangalore, India

High School (10th); 87%

2020 – 2021

CERTIFICATIONS & COURSEWORK

- **Programming & Software Development:** Programming with Java, Software Design and Project Management, Generative AI for Software Development.
- **Enterprise Technologies & Data Analytics:** SAP Professional Fundamentals (Coursera), Power BI Micro Course.
- **Communication & Professional Skills:** Advanced Writing – Communication Foundation (UCI via Coursera), Technical Communication.
- **Awards:** Galactic Problem-Solver – NASA Space Apps Challenge (2025), Department Hackathon Winner (2026).
